## Visitor Authentication & Management System

Check-in, Authenticate & Manage Visitors

Visitor Authentication & Management System that logs all visitor records and information.  
 Makes for a quick & seamless check-in and check-out process.

### Simple, Efficient Visitor Management System

#### For School Administrators

Easily track school visitors' location at any time from anywhere.

#### For School Faculty & Teachers

Plan for visits in advance and approve only authorized visitors who you actually invited.

#### For Parents & School Visitors

Dramatically reduces wait time by automating the registration and check-in process.

#### For Schools

Create a list of people who are allowed (or restricted) to pick up a student. Conduct instant background checks for all school visitors.

### Advanced Features include:

- ✓ Ability to scan Visitor Drivers license & QR codes
- ✓ Background verification against National Sex Offender Database
- ✓ Child Pickup with Approved and Restricted List
- ✓ Ability to check-in visitors with (or without) approval
- ✓ Badge Printing
- ✓ Access Control Integration\*
- ✓ Mobile App supports Android and iOS Platform

\*Only with on-premise version

## Registration is as easy as 1-2-3

1 School personnel sends meeting invitation/QR code to Visitor via text or e-mail.

2 Visitor displays their phone containing invitation/QR code to School personnel security desk. School entry is fast & secure.

3 Both school visitor entry & exit are automatically logged by QR code.

Save approximately \$22,000/year freeing a front desk executive for other duties.

Free around 440 hours/year by using hours of prior front desk resource.

Audit trail can easily span more than 3-5 years.

Enhance your visitor experience with a digital visitor management.

# CONTROL & SECURITY SOLUTIONS

## METAL DETECTORS

Stop concealed dangerous metal objects BEFORE they enter. ZKTeco Walk-through Metal Detectors help foster a safe environment.

*Integrating Hybrid-biometric security technology safeguards your building, employees and visitors.*

## INTEGRATED BARRIER ACCESS CONTROL

Today's entrance controls are vulnerable if they're not integrated and depend solely on security guards. Conversely, ZKTeco turnstiles, door & elevator controllers remain locked until all metal detector alarms are cleared.

## VISITOR MANAGEMENT

Today's visitor management systems risk imposters and unauthorized visitors from entering your building. Conversely, ZKVAMS software generates a secret QR code issued only to authorized visitors. Security guards won't allow anyone to enter the building without a valid QR code.

## INTEGRATED SECURITY PLATFORM

Integration and layering of security application is the key to greater safety. ZKBioSecurity is an integrated security platform which ties everything together. Modules include Access Control, Elevator Control, Visitor Management, Video Integration and more!
